Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 1-20 are drawn to a computer implemented process that merely manipulates data or an abstract idea, or merely solves a mathematical problem without a limitation to a practical application in the technological arts.

In order for a claimed invention to accomplish a practical application, it must produce a "useful, concrete and tangible result" *State Street*, 149 F.3d at 1373, 47 USPQ2d at 1601-02 (see MPEP 2106.II.A). A practical application can be achieved through recitation of "a physical transformation outside the computer for which a practical application in the technological arts is either disclosed in the specification or would have been known to a skilled artisan", or "limited to a practical application within the technological arts" (MPEP 2106 IVB2(b)). Currently, claims 1-20 meet neither of these criteria. In order to for the claimed process to produce a "useful, concrete and tangible" result, recitation of one or more of the following elements is suggested:

- * The manipulation of data that represents a physical object or activity transformed from outside the computer (MPEP 2106 IVB2(b)(i)).

* A recitation of a physical transformation outside the computer, for example in the form of pre or post computer processing activity (MPEP 2106 IVB2(b)(i)).

* A direct recitation of a practical application in the technological arts (MPEP 2106 IVB2(b)(ii)).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 21-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Chu et al. (U.S. Patent No. 6,802,611).

Regarding claim 21, Chu discloses:

- a camera 208 capturing one or more images of a white board 101 that includes one or more items projected by projector 206 (Fig. 1) on the white board 101 and writings on the white board 101 as shown in Fig. 5;

- a visual echo cancellation module for separating into two files the one or more items (i.e., images 106 and 106') and the writings (i.e., text and drawings) written on the white board 101 (col. 5, lines 51-56).

Regarding claims 22 and 23, Chu teaches:

- a remote site (i.e., a computer 202) with a display (i.e., a monitor) for displaying the one or more items projected on the white board and writings on the white board 101 (Fig. 1);

- a network (i.e., interconnecting cable 204) for sending said one or more items projected on the white board 101 and writings written on the white board 101 to said remote site (i.e., computer 202) in two separate files (Fig. 1).

Regarding claim 24, Chu teaches sending back annotations inherently by computer 202 to the white board 101 to be displayed with one or more items projected on the white board 101 (Fig. 1).

Allowable Subject Matter

5. Claims 25-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 25, the prior art, taken either singly or in combination, does not teach:

- obtaining geometric calibration data... by a camera; obtaining color calibration... by said camera; using the ratio... on the white board.

Regarding claims 26-28, since these claims depend from claim 25, they are also objected for the same reason.
